WORK EXPERIENCE

CohesionIB — Chicago, Illinois

Implementation/Technical Program Manager — April 2026 - September 2026

- Led **3 end-to-end implementations for enterprise CRE buildings**, owning technical delivery across **access control configuration, API/ SSO integrations, and cross-functional coordination**, reducing go-live time by 20%.
- Built **15+ Databricks pipelines** and an **MCP server** to integrate real-time building data from **building management systems** into Savvy AI platform, replacing static reporting with live, queryable building data.
- Shipped **4 client-facing AI capabilities**, including **AI-generated portfolio insights and branded report exports**, translating complex building data into actionable, client-ready outputs for CRE stakeholders.
- Built and maintained **20+ curated AI evaluation datasets** covering real-world CRE use cases and edge cases, providing the foundation for **500+ AI evaluation experiments** and standardized benchmarking across AI product iterations.

Humanitarians AI — Boston, Massachusetts

AI Product Manager — July 2025 - April 2026

- Led **0→1** product development for **Mycroft, an AI workflow platform for finance teams**, orchestrating multi-agent workflows for portfolio analytics, risk modeling, and financial statement intelligence.
- Reduced **AI hallucination rate** from **22% to 11%** and improved autonomous task completion from **78% to 89%** for financial query workflows.
- Built an **agent observability** dashboard **to track 3 KPIs (task success, reasoning quality, latency),** maintaining a **95% autonomous rate.**

JuliaHub Inc. — Boston, Massachusetts

AI Product Manager Intern — August 2024 - February 2025

- Retained **$1.3M in ARR** by shipping **AI-powered code analysis APIs for a developer platform;** defined SDK integration requirements, validated through **25+ user interviews**, reducing enterprise churn from **8.4% to 6.0%**.
- Redesigned the **developer onboarding flow,** cutting time-to-first-success by **70% (3 hrs to 45 minutes)** and **increasing MAUs by 20%.**
- Ran **A/B tests** across 4 features **with 2,000+ users** increased experiment win rate from **18% to 29%,** improving feature **ROI by 28%.**

MindFire Inc. — Chicago, Illinois

Product Manager Intern — June 2024 - August 2024

- Restructured internal **data pipelines** to eliminate redundancy and improve maintainability, saving **15+ hours per week** in **data operations**.
- Built **KPI dashboards** tracking **ARR, CAC, and sales pipeline,** surfacing 2 bottlenecks that shortened the sales cycle from **38 to 26 days.**
- Launched **an AI chatbot for 9,000+ DAUs**, achieving a **30% reduction in support tickets** and increasing **CSAT from 4.1 to 4.6/5.**

Webvision Solution Ltd. — Gujarat, India

Product Manager — January 2022 - July 2023

- Led product development lifecycle of **6 SaaS products** using Agile/Scrum, writing epic and user stories, reducing average release cycle from **10 weeks to 7 weeks** and delivering features 3**0% faster**.
- **Managed a cross-functional team of 9 professionals** to ship 5 major features that improved **customer retention by 22%** and elevated **net promoter score** (NPS) from **47 to 63 over two quarters.**
- **Optimized the product lifecycle** through automated testing and CI/CD pipelines, **reducing bugs** by **30%** and **post-launch fixes by 60%.**
- Grew feature adoption from **31% to 56%** across **30+ enterprise clients,** reduced onboarding time from **3 weeks to 9 days** and **cut support escalations by 35%** through structured feedback loops.

GrowthCruise — Gujarat, India

Co-Founder & Product Manager — September 2019 - January 2022

- **Owned product strategy and roadmaps** for **15+ client projects** across B2B/B2C SaaS, with clients collectively generating **$5M+ in annual revenue**.
- Ran continuous **user research and feedback cycles** to prioritize features, **increasing product adoption by 35% within 6 months.**
- Managed resource allocation and budgeting while scaling company revenue **10X to $300K ARR** within the first year.
- Established **KPIs and performance dashboards** to monitor client product success, improving **customer satisfaction scores by 30%.**
